Subscribe to OLAT News

Always up-to-date study information:
How do I subscribe to OLAT news via e-mail or smartphone?
What are subscriptions?

You can subscribe to various objects in OLAT and then be informed about news by e-mail or RSS news feed. Forums, folders, calendars, tasks and much more can be subscribed to. From now on you don't have to log into OLAT to see whether new posts have appeared in a forum or new files have been uploaded to a folder, for example, but are automatically notified.
To subscribe to a block, select it and click the button next to Changes in the upper right area until it says "On". If you want to cancel the subscription, set it to "Off" again.
Subscribe to OLAT News

You will automatically receive notifications of your subscriptions by e-mail. In the "Settings" section under your personal tools, you can specify how often you want to receive a notification and whether it should only be delivered to your internal OLAT mailbox or also forwarded to your stored e-mail address.
To get an overview of your existing subscriptions, click on your profile picture at the top right of the screen and then on "Subscriptions".
Subscribe to OLAT News

With a click on "Send news by e-mail" you will receive a summary of all news from your subscriptions by e-mail. You can select a date and the type of subscription (calendar, forum etc.) to filter the news (e.g. all changes in all subscribed folders since 23.04.2018).
Subscribe to OLAT News

In the "Subscriptions" section you can manage your subscriptions. Click on the respective link in the "Type" column to go directly to the subscribed module; in the "Action" column you can delete existing subscriptions.
In the "RSS News Feed" section you will find your personal RSS link to read the news with an RSS reader of your choice. There are many different free and paid RSS reader apps for Android, iOS and Windows Phone, but the operation is always the same: You only have to enter the link to your OLAT RSS feed in the app to be informed about news of your subscriptions.
We will be glad to help you.
